NOTES: Information shown is abbreviated. See website for complete information. Performance shown is based on the following operating conditions: 75°F, 50% relative humidity room design temperature. The "Near Zone Range" provides the distance in feet, measured from the face of the diffuser to where the discharge air drops down to 1" above floor level. Units are tested in accordance with the following standards: Air Flow Rate EN-ISO 5167-1 and Sound Power Level EN-ISO 7235.
